

AMINO-TRACK

Trade Name : AMINO-TRACK™

Physical & Chemical Properties :

AMINO-TRACK consists of 3 mains major plant nutrients and precursors including amino acid (16 types), cytokinin enriched algae, and trace element chelated in a soluble powder form.

Detailed Composition	:	Amino acids total	700 g/kg
		Cytokinin enriched algae	100 g/kg
		Magnesium (Mg)	10.8 g/kg complexe
		Iron (Fe)	8.0 g/kg chelate
		Manganese (Mn)	8.0 g/kg chelate
		Zinc (Zn)	3.0 g/kg chelate
		Boron (B)	1.0 g/kg inorganic
		Copper (Cu)	3.0 g/kg chelate
		Molybdenum (Mo)	0.2 g/kg inorganic
		Cobalt (Co)	0.1 g/kg chelate

Manufacturing Method & Process :

Weight each ingredient and mix in a conventional mixing apparatus.

Application Method & Direction for Use :

For all kinds of crops, use 20-40 gm per 20 liter of water spray every 7-14 days.

AMINO-TRACK can be tank mixed with all pesticides and fertilizers, hormones, for spraying at the same time.

Packing : 100, 500 gram, 1 kg. plastic bottle, 25 kg. paper carton.
