

CALIBIAN

Trade Name : CALIBIAN[®]

Physical & Chemical Properties :

A concentrate liquid mixture of calcium and boron in an appropriate proportion.

Composition :

Calcium	6.0 % w/v as Ca
	(or 8.4 % w/v as CaO)
Boron	2.0 % w/v as B
	(or 6.0 % w/v as B ₂ O ₃)

Application Method & Direction for Uses :

For all kinds of crops use Calibian at the rate of 0.1-0.15%. Spraying application should be made as early as possible for completion of fertilization. Repeat application at least 3-4 times for a better fruit quality and higher yield.

Packing : 500 cc., 1 lt. glass bottle, 4 lt., 20 lt. plastic gallon.
